*** REQUESTED PROCEDURE UNDER WHICH TO EVALUATE INTERCONNECTION REQUEST (check one)**

Please indicate below which review procedure applies to the interconnection request. The review procedure used is subject to confirmation by the Cooperative.

<input type="checkbox"/>	Level 2 - Lab-certified interconnection equipment with an aggregate electric nameplate capacity less than or equal to 150 kVA. Lab-certified means the same as defined in Iowa Utilities Commission Chapter 45 rules on Electric Interconnection of Distributed Generation Facilities (199 IAC.45.1). (Application fee is \$250 plus \$1.00 per kVA)
<input type="checkbox"/>	Level 3 - Distributed generation facility does not export power. Nameplate capacity rating is less than or equal to 50 kVA if connecting to area network or less than 150 kVA if connecting to a radial distribution feeder. (Application fee amount is \$500 plus \$2.00 per kVA.)
<input type="checkbox"/>	Level 4 - Nameplate capacity rating is less than or equal to 10 MVA and the distributed generation facility does not qualify for a Level 1, Level 2, or Level 3 review, or the distributed generation facility has been reviewed but not approved under a Level 1, Level 2, or Level 3 review. (Application fee amount is \$1,000 plus \$2.00 per kVA, to be applied toward any subsequent studies related to this application.)

Note: Descriptions for interconnection review categories do not list all criteria that must be satisfied. For a complete list of criteria, please refer to Iowa Administrative Code Chapter 15, Midland's tariff and Midland's interconnection agreement.

DISTRIBUTED GENERATION FACILITY INFORMATION

Commissioning Test Date: _____ (If the Commissioning Test Date changes, the interconnected member-consumer must inform the Cooperative as soon as it is aware of the changed date. Notice must be at least 15 business days prior to the test date.)

List interconnection components/systems to be used in the distributed generation facility that are lab-certified.

Note: Nothing in this Application, in the Interconnection Agreement, or in Cooperative's tariffs shall be construed to guarantee a particular price or rate for any period of time for an interconnected member-consumer seeking services pursuant to this Application. In the event the tariff rate applicable to operations or requirements of an interconnected member-consumer seeking services pursuant to this Application is modified for such rate class, such new rate shall be applicable to the interconnected member-consumer.

There is no net billing option available for new interconnections within the cooperative service territory.

Certain metering functionality may be unavailable depending on Member-consumer's current installation.
